Life imitates art and art imitates nature.

Using proprietary state of the art technology combined with century old artisan craftsmanship, we aimed at recreating the man made representation of God's perfect creation.

Made using the most latest high resolution digital printing technologies in 1000 dpi, more than 3 x industry standard resolution, Fantasy Agata is a collection that achieves photogenic perfection.

Thanks to its unique lustrous finish, the chromatic complexity and depth of the graphics, we've made the most faithful reinterpretation of agate agglomerate to date.

Fantasy Agata are authentic wall covering jewels represented in 3 colors.

Actual size 47.25" x 106" x 1/4" (120x270x0.6 cm)

Not recommended to use on floors.
